

### Addition and Subtraction

a)  $800,000 - 500,000 =$

b)  $508,040 - 204,020 =$

c)  $9,432 - 999 =$

### Time

Match the clock to the digital displays showing the same time.

12 : 15

01 : 15

13 : 15

00 : 15

03 : 00

**Remember** to also have a go at TTRS, Spelling Shed and Lexia (if you have it)! All links are on the class page.

### Reasoning

Shen is using mental strategies to calculate  $80,400 + 11,000$ .

I partitioned 80,400 into 80,000 and 400.

I partitioned 11,000 into 10,000 and 100.

$$80,000 + 10,000 = 90,000$$

$$400 + 100 = 500$$

$$90,000 + 500 = 90,500.$$

Do you agree with Shen? Explain your answer.

### Fractions

Use the diagrams to help you fill in the missing numbers for these equivalent fractions.

|               |               |               |               |
|---------------|---------------|---------------|---------------|
| $\frac{1}{3}$ |               | $\frac{1}{3}$ |               |
| $\frac{1}{6}$ | $\frac{1}{6}$ | $\frac{1}{6}$ | $\frac{1}{6}$ |
| $\frac{1}{9}$ | $\frac{1}{9}$ | $\frac{1}{9}$ | $\frac{1}{9}$ |

$$\frac{1}{3} = \frac{\square}{9}$$

$$\frac{2}{3} = \frac{\square}{6}$$

$$\frac{\square}{3} = \frac{6}{9}$$

### Multiplication

$6 \times 4 = \underline{\quad}$

$7 \times 8 = \underline{\quad}$

$99 \div 11 = \underline{\quad}$

$4 \times 6 = \underline{\quad}$

$8 \times 7 = \underline{\quad}$

$99 \div 9 = \underline{\quad}$

$12 \times 2 = \underline{\quad}$

$6 \times 7 = \underline{\quad}$

$32 \div 4 = \underline{\quad}$

$2 \times 12 = \underline{\quad}$

$7 \times 6 = \underline{\quad}$

$32 \div 8 = \underline{\quad}$
